Vietnam has undergone rapid economic growth in recent decades, becoming one of the fastest-growing economies in the world. This growth has been driven by a shift towards export-oriented manufacturing, which has led to a significant increase in the number of workers employed in the formal and informal sectors.

However, this economic growth has come at a cost. Workers in Vietnam face a wide range of labor rights violations, including low wages, long hours, unsafe working conditions, and lack of access to social protection. In addition, workers' rights to organize and bargain collectively are often restricted.

This book offers a comprehensive analysis of the current state of labor rights and resistance in Vietnam. It examines the various forms of labor

exploitation and resistance that have emerged in the country's rapidly industrializing economy. The book also provides a critical assessment of the role of the state, trade unions, and NGOs in shaping the labor landscape in Vietnam.
